Year Group News Year 5

Class news
20/11/26

Year 5 have made a fantastic start to the second half of the term. In English, we have begun reading Cloud Busting and have enjoyed exploring the characters and their relationships. The children have also written and published their own intensifying simile poems.

In P.E., we have started our gymnastics and quicksticks units, the children have shown great enthusiasm. In History, we are continuing our Crime and Punishment topic. Recently, we learned about the harsh punishments used during Tudor times, including some of the torture methods that were carried out, and discussed how justice has changed over the years. In Science, we have begun our exciting Space unit.

The children investigated the distances of the planets from the Sun and researched answers to their own space-related questions. They also enjoyed a hands-on learning experience by building a mechanical solar system, allowing them to observe how the planets orbit the Sun and helping to bring their understanding of our solar system to life.
