Class News

13/3/26 The last few weeks have been action packed including a science show and an author visit thrown into the mix. In English, we finished reading (finally) *Curse of the Maya*; the children loved this book and produced some fantastic chapter continuations from the perspectives of different characters for their last piece of writing. We have now launched into the dark tragedy of *Macbeth* where we have already watched an animation to get a full sense of the plot and are writing in role as *Macbeth* to *Lady Macbeth*. In maths, we have completed our unit on algebra and have started our unit on area and perimeter. As it has been science week, we have blitzed our learning on the heart (including looking at a dissected lamb's heart and acting out the circulatory system on the playground). We have started new units on tennis and gymnastics and are learning hobbies in Spanish.

24/4/26 As we head towards SATs, the children have been working extremely hard. In maths, we are finishing reasoning about angles and are recapping key parts of the maths curriculum. In English, we have immersed ourselves in the biography of *Harriet Tubman* and been very interested in her fight against slavery. In PE, we have finished our units on gymnastics and tennis (without losing many tennis balls). In geography, we have started our geography unit on North America starting with some of its most famous physical features. (If only we could go on a field trip there!) Playing the 12 bar blues and learning the blues scale has been our focus in music and we have started our unit on evolution and inheritance in science. The children have been looking at how we can use AI and the ethical issues surrounding it. (We should use AI to write this next time!) We are really proud of how the children have settled into this new term.
