

Year Group News Year 5

Class news

24/4/26 In Year 5, we have noticed a real shift in the children's maturity as we move towards the end of the penultimate half term. In Maths, we have been focusing on adding and subtracting decimals, as well as reading and interpreting timetables with great accuracy. We recently concluded our Avatar English unit with narrative writing, where the children described a journey through the world of Pandora. This task was approached with great enthusiasm and truly sparked their imagination. In Geography, the children have been learning how to read maps using six-figure grid references. This culminated in an exciting treasure hunt, where they combined solving maths equations and map-reading skills to find clues. In DT, the children have been designing their initial fairground rides and are now ready to group their ideas and build prototypes. In PE, after developing their cricket skills over the past few sessions, the children are now applying these in matches. In indoor PE, we have been using basketballs and unusual objects to create a STOMP-inspired dance performance. Our school Eco Team has also set us an exciting project to repurpose an old, damaged trumpet. The children have painted it with colourful designs inspired by the artist Kevin Munday. These trumpets will be used as flowerpots as part of a gallery display in Winchester. As always, it has been another busy and exciting couple of weeks!
