Year 4 have had a busy few weeks! We have enjoyed netball matches and fitness circuits during our PE sessions.

In Science, we investigated the effect different drinks have on eggshells to help us understand dental health, before creating our own models of the human digestive system using tights and different foods!

We built our own Anglo-Saxon villages and labelled their key settlement features to develop our historical understanding of this period.

In Maths, we have been mastering written methods for addition and subtraction and applying these to problems.

Finally, in English, we explored Beowulf and are currently writing our own exciting versions, complete with monsters of our own creation!
